SECTION 11 - EXPLANATION OF TERMS (cont'd)

NETWORK CONTROL SIGNALING

The transmission of signals used in the telecommunications system which perform functions such as supervision (control, status and charging signals), address signaling (e.g. dialing), calling and called number identification, audible tone signals (call progress signals indicating re-order or busy conditions, alerting) to control the operation of switching machines in the telecommunications system.

NETWORK CONTROL SIGNALING UNIT

The terminal equipment furnished, installed and maintained by the Telephone Company for the provision of network control signaling.

NODE

The location to which digital channels are routed and where access is provided to such lines and associated equipment for testing.

NRC - Non-recurring Charge. The initial or one-time charge usually associated with initiation or establishment of service.

OCN (OPTICAL CARRIER LEVEL-N)

The optical interface designed to work with the STS-n signaling rate in a Synchronous Optical Network (SONET). OC-1 is a 51.840 Mbps signal. All higher levels are direct multiples of OC-1.

ONE MILE RATE

Rate basis used if the serving wire center for the underlying carrier and the customer's premises is one mile or less apart.

PBX

A private branch exchange.

POINT OF PRESENCE (POP)

The Company's physical presence in a local calling area or LATA which is used for the purpose of transmitting telephone calls or dedicated interconnection with a LEC.
