RESALE OF COMMUNICATIONS COMMON CARRIER SERVICE

3.4 Terminal Equipment

Carrier's service may be used with or terminated in customer provided terminal equipment or customer provided communication systems, such as teleprinters, handsets, or data sets. Such terminal equipment shall be furnished and maintained at the expense of the customer. The customer is responsible for all costs at his premises, including customer personnel, wiring, electrical power, and the like incurred in his use of Carrier's service.

If the customer fails to maintain and operate his terminal equipment properly, resulting in the occurrence or possibility of harm to Carrier's equipment or personnel, or impairment to the quality of service to other customers, Carrier may, upon written notice, require the use of protective equipment at the customer's expense. If this fails to produce satisfactory quality and safety of service, Carrier may terminate the customer's service.

3.5 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The company uses the rate centers and associated vertical and horizontal coordinates that are generally accepted within the telecommunications industry.

FORMULA:

The Square Root of: 
$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$
