Section 7 - LONG DISTANCE SERVICE

7.1 The Company offers the following long distance services:

7.1.1 Message Toll Service (MTS)

Outgoing long distance service whereby the customer accesses the Company's underlying carrier's network on an equal access or dial-up basis.

In non-equal access areas, the customer will gain access to the Carrier's network by dialing a 101XXXX access code which will be provided by the Company.

7.1.2 Inbound Service (8XX)

Inbound service is virtual banded inbound toll service which permits calls to be completed at the subscriber's location without charge to the calling party. Access to the service is gained by dialing a ten digit telephone number which terminates at the customer's location. Inbound services originate via normal shared use facilities and are terminated via the customers' local exchange service access line.

Carrier will accept a prospective inbound service customer's request for up to ten (10) telephone numbers and will reserve such number(s) on a first come first serve basis. All requests for number reservations must be made in writing, dated and signed by a responsible representative of the customer. Carrier does not guarantee the availability of number(s) until assigned. The telephone number(s) so requested, if found to be available, will be reserved for and furnished to the eligible customer.

If a customer who has received a number does not subscribe to the Company's inbound service within 90 days, the company reserves the right to make the assigned number available for use by another customer.
