

CenturyLink Communications, LLC
PSC NO. 1 - TELEPHONE
Interexchange Services
Effective Date: July 23, 2015

Section 6
Leaf 79
Revision: 0
Superseding Revision:

6. OBSOLETE BUSINESS COMPLEX SERVICE OFFERINGS

6.5 VOICE LONG DISTANCE CONTRACTUAL ARRANGEMENTS

1. Q.Government Network Services
 - e. Optional Features
 - (2) Toll Free (Inbound) (Cont'd)

- (j) Extended Call Coverage

The default for CenturyLink origination is the domestic United States. Subscribers may also order extended call coverage options. Two options are available.

- Allows calls to originate from Alaska and Hawaii.
- Allows calls to originate from Puerto Rico and the U.S. Virgin Islands.

- (k) Project Account Codes

- Verified Codes offer secure access to a toll-free number by requiring callers to enter a specific 2 to 11-digit code to complete the call. The codes are defined by the subscriber and must be of the same length for any given toll-free number. If the code entered is not valid the call will be blocked.
- Non-Verified Codes requires the input of any non-specific 2 to 11-digit codes to complete the call. The subscriber defines the length of the codes. The codes of any given toll-free number must be of the same length.

- (l) Geographic Routing

- Geographic Routing cannot be used in conjunction with any other optional feature. This feature allows a subscriber to create two or more originating routing areas and direct each area to a different terminating location with a single 800/888 number. Subscribers may define the originating areas by NPA or by NPA/NXX.
- For example, a business with five business locations in five area codes may terminate calls originating in each NPA to the business location in that NPA. Calls are immediately connected to the office in the area without the caller redialing or being transferred.
