12. OBSOLETE PRIVATE LINE SERVICE OFFERINGS

12.1 DATA SERVICES (Cont'd)

N. Optional Service Features

1. Clear Channel Capability

Clear Channel Capability provides customers the use of the full 64 Kbps per DS-0 channel and allows DS-0 and DS-1 transmissions with more than 15 consecutive zeros. Clear Channel Capability is supported for:

- TransLink (T-1)

Clear Channel Capability is supported only by the use of the Bipolar with Eight Zero Substitution (B8ZS) line coding technique. Clear Channel Capability requires B8ZS on the T-1 Local Access Facilities. Customer premises equipment must also be B8ZS-compatible.

O. Term Plan

Customers may subscribe to Private Line Services under one, two or three year term plans. The rates in effect for Private Line Services and Local Access Facilities at the time the customer commits to a term plan will be fixed for the duration of the term plan. The term will begin on the first day of the month following the date the service is installed and available. Upon expiration, the term will be automatically extended at the term plan rates for successive ninety (90) day periods, unless sixty (60) days prior to the end of the term or each such extension either (a) the customer or the Company provides written notice to the other that it does not want such extension, or (b) the customer subscribes to another term plan for which the rates of the new term will apply.

If additional customer sites are added to a customer's Private Line Service after the initial subscription to a term plan, such sites will be incorporated into the customer's term plan and will have the same termination date as the customer's original term plan. Existing customers may subscribe to a new term plan for Private Line Services of the same or greater value prior to the end of the customer's existing term plan without incurring any termination liability if the new term plan extends beyond the old term plan termination date by at least one year or if the new term plan is for three years.
