PSC NO. 4 - TELEPHONE
Competitive Access Services Tariff
Effective Date: July 23, 2015

Section 6
Leaf 4
Revision 0
Superseding Revision: }

6. SWITCHED ACCESS SERVICE

6.1 GENERAL (Cont'd)

6.1.1 SWITCHED ACCESS SERVICE ARRANGEMENTS AND MANNER OF PROVISION

- A. FGD is furnished on a per trunk basis.
- B. Trunks are differentiated by type and directionality of traffic carried over a Switched Access Service arrangement. Differentiation among traffic types is necessary for the Company to design Switched Access Service properly to meet the traffic carrying capacity requirement of the customer.
- C. There are two major traffic types:
 - 1. Originating traffic type represents access capacity within a LATA for carrying traffic from the Company's end user to the customer.
 - 2. Terminating traffic type represents access capacity within a LATA for carrying traffic from the customer to the Company's end user.

When ordering capacity for Trunkside Switched Access, the customer must, at a minimum, specify such access capacity in terms of Originating and/or Terminating traffic type.
