

CenturyLink Communications, LLC
PSC NO. 1 - TELEPHONE
Interexchange Services
Effective Date: July 23, 2015

Section 2
Leaf 10
Revision: 0
Superseding Revision:

2. GENERAL REGULATIONS

2.1 DEFINITION OF TERMS (Cont'd)

Interconnection Facilities

Circuits and/or dedicated access arrangements provided by the customer or a third party supplier to interconnect the customer with the Company's service. The customer shall have sole responsibility for the ordering, installation, maintenance, and payment of such facilities.

IXC

Denotes an interexchange carrier.

Kbps

Kilobits per second.

Kilo Bits Per Second (Kbps)

The number of one-thousand bits transmitted in a one second interval.

LightLink Service

LightLink Service provides a high capacity channel for the transmission of 44.736 Mbps isochronous serial data having a line code of Bipolar with Three Zero Substitution (B3ZS). LightLink Service is provided between two points located within the contiguous United States. The required format and interface specifications are contained in Technical Reference Publications 62508 and 62411, and the associated Addendum TR-INS-000342 and TR-NPL-000054.

Local Access Facility

The channel provided by the local telephone company (or other local service provider) to connect the Point of Presence to a customer location.

Local Access Provider

A local exchange carrier or other entity which furnishes inter-connection facilities between the customer's premises and the Company's point of presence in a LATA.
