SERVICE CLASSIFICATION No. 6C - Continued**Term:**

Unless otherwise reflected in an individually negotiated service agreement under Rate Schedule 3, or as otherwise provided in this Rate Schedule, service under this Service Classification will be for a period of one year from the date of commencement of service and thereafter until terminated by either party. The service agreement is terminable by either party after one year from the commencement of service on six months written notice to the other or terminable in the manner provided by law and the rules and regulations set forth in the Company's Rate Schedule, on file with the Public Service Commission.

Special Provisions:**General:**

- a. Unless otherwise expressly authorized by the Company in writing, the "alternate fuel" hereunder will be No. 2 fuel oil.
- b. The "Local Outside Temperature" for the purposes of a local switchover will be the temperature as measured outside of the Customer's premises.
- c. The "LaGuardia Airport Temperature" for the purposes of a Company-initiated interruption will be the temperature measured by the National Weather Service at LaGuardia Airport.
- d. The "Designated Temperature(s)" will be the temperatures set annually prior to the winter season by the Company. The Company reserves the right to adjust this temperature setting, based on system needs, with a minimum forty-eight (48) hours' notice to Customers. There will be a "Designated Interruption Temperature" when a Customer's equipment will be switched over to an alternate fuel and a "Designated Resumption Temperature" when the Customer's equipment may be switched back to natural gas. There may be different Designated Temperatures for Customers with fully automatic controls and Customers with semi-automatic controls.
- e. The Company reserves the right to install and operate such local and remote telemetering/control switching devices as may be necessary to allow for the immediate switchover between gas service and alternate fuel usage, as provided for under this Service Classification.
- f. A cogeneration customer taking service under this service classification must have generation capacity of less than 50 Megawatts. Electricity generated by customer is to be used to supply all or part of the electrical requirements of that customer and may also be used to supply: i) other customers within a defined geographic location which shall include customers that are eligible to be served by a cogeneration facility, as defined in Section 2 of the New York Public Service Law that is less than 50 Megawatts and/or ii) the local electric utility via net metering.
