Section 8
Leaf No. 1
Revision: 1
Superseding Revision: 0

8. AT&T SWITCHED ETHERNET SERVICEsm

AT&T Switched Ethernet Service is a switched Ethernet transport service providing Ethernet transport functionality using fiber and a switched Ethernet core network.

AT&T Switched Ethernet Service provides full duplex transport of data signals between a Customer's Site and an Ethernet switch in an AT&T office.

AT&T Switched Ethernet Service may be purchased by both Carriers and End Users. (N)

The following General Regulations found in Section 2 do not apply to AT&T Switched Ethernet Service:

<u>Section</u>	<u>Description</u>
2.1.2 E	Limitations
2.1.8 A	Refusal and Discontinuance of Service
2.4.1	Description of Rates and Charges
2.4.5	Credit Allowance for Service Interruptions
2.4.8	Ordering, Rating and Billing of Access Services Where More Than One Local Telephone Company is Involved
2.4.11	Moves, Adds, and Changes
2.8	Service Availability and Rating Information
2.12	Automatic Number Identification Terms and Conditions
2.13	Ordering Options for Access Services

8.1 Service Description

AT&T Switched Ethernet Service is a switched Ethernet transport service providing Ethernet transport functionality using fiber access facilities and a switched Ethernet core network. AT&T shall determine the interface specifications for AT&T Switched Ethernet Service in its sole discretion. Customers may obtain the interface specifications from their account representatives. AT&T Switched Ethernet Service provides full duplex transport of data signals between a Customer's premises and an Ethernet switch. Hereinafter, the phrase "Customer's premises" and "Customer location" (or similar terms) shall be construed to include an end user's premises, as appropriate in the context, where the Customer is a Wholesale Customer and service is terminated at the premises of an end user that is not the Customer of record of AT&T.

AT&T Switched Ethernet Service supports point-to-point, point-to-multipoint or multipoint-to-multipoint configurations. Point-to-point service provides a connection between two ports. Point-to-multipoint service provides multiple point-to-point connections to multiple ports in the network. Multipoint-to-multipoint service provides a connection between three or more designated ports on the AT&T Switched Ethernet Service network. Where facilities are not available, facilities may be constructed, subject to certain conditions as determined by AT&T. Special Construction charges may apply.

AT&T Switched Ethernet Service will be provisioned using the service components described below. AT&T Switched Ethernet Service is available in a Basic Service Arrangement and Basic Ports described below.
