SECTION 3 - SERVICE AND RATE DESCRIPTIONS, (CONT'D.)

3.2 InterLATA Calling Service, (Cont'd.)

3.2.2 Timing of Calls

Long distance usage charges are based on actual usage. Chargeable time begins when a connection is established between the calling station and the called station. Chargeable time ends when either party "hangs up" thereby releasing the network connection. If the called station hangs up, but the calling station does not, chargeable time ends when the network connection is released by automatic timing equipment in the network. Chargeable time does not include time lost because of faults or defects in the connection.

The minimum call duration and rounding of calls for measurement and billing purposes is six seconds. The duration of each call will be rounded off to the nearest higher increment for billing purposes. Fractional cents will be rounded to the next higher cent.

3.2.3 Terms of Service

The rates for InterLATA Calling Service are based on volume and/or established one (1) year, two (2) year, or three (3) year term contracts for the Company's business Customers. The rates are further segregated between switched and switchless type service. Switchless service may be offered in a package with other services or by itself at a rate or discount offered on a contractual basis. Rates will be offered to the Customer in writing and on a non-discriminatory basis. Contracts resulting from a special request will be submitted for approval and filed with the Commission if required. Upon expiration of a term contract, the service term will automatically renew at the same terms and conditions for successive one (1) year terms unless either party notifies the other thirty (30) days prior to the expiration of the then current term that it wishes to terminate the service

Note: Off-net provisioning will require additional mileage and/or back haul charges to be added.
