LOCAL EXCHANGE SERVICES TARIFF

SECTION 9 - GRANDFATHERED SERVICES, (CONT'D.)

- 9.5 Digital PBX Trunk Service (Grandfathered*) - Service is limited to the Company's Customers of record as of February 3, 2006.

9.5.1 General

Digital PBX Trunk Service provides a Customer with connection to the Company switch via a DS1 digital fiber optic transmission facility operating at 1.544 Mbps. Digital PBX Trunks are provided for connection of Customer-provided PBX equipment or trunk capable key systems to the Company switch. Customers must have the ability to terminate a DS1 signal.

Each Digital PBX Trunk can be configured as an Inward, Outward, or Two-Way trunk. Customers may purchase Individual Telephone Numbers for use with Inward and Two-Way trunks for additional charges. This enables a PBX to switch an incoming call directly to the intended extension number without the need for an attendant.

Digital PBX Trunk Service may be configured into a hunt group with other Company-provided Digital PBX Trunks.

The Company will consider requests for large quantities, i.e. 97 or more trunks, on an Individual Case Basis only.

Digital PBX Trunks sold to qualified VersiPak Customers may be eligible for discounted rates as indicated.

A. Flat Rate Digital PBX Trunks

Flat Rate Digital PBX Trunks allow the Customer to place unlimited outward dialed calls within the Company-designated local calling area at no additional charge.

B. Message Rate Digital PBX Trunks

Message Rate Digital PBX Trunks provide the Customer with message rated dialing within the Company-designated local calling area.

C. Measured Rate Digital PBX Trunks

Measured Rate Digital PBX Trunks provide the Customer with measured rate dialing within the Company-designated local calling area.
