SECTION 7 - PUBLIC TELEPHONE SERVICES, (CONT'D.)

7.3 Public Access Smart-Pay Lines, (Cont'd.)

7.3.3 Feature Descriptions

- (A) Outward Call Screening - this feature is designed to prevent a PAL user from obtaining service through an operator when such service is billed to the calling number. An Automated Number Identification (ANI) code is transmitted to alert the operator and carrier systems that the call is originating from a PAL and may require special handling and billing treatment. If the facilities of an interexchange carrier are not compatible with the Company's signaling arrangements, directly dialed interLATA calls may be blocked by the carrier.
- (B) PAL Blocking Option 1 - this feature blocks a PAL user from prefixes 394, 540, 550, 910, 920 and 970 and the service access codes 700 and 900.
- (C) PAL Blocking Option 2 - this feature blocks a PAL user from prefixes 394, 540, 550, 970 and 976 and the service access codes 700 and 900.
- (D) International Direct Dialed (011) Blocking - this feature blocks a PAL user from international directly dialed calls.
- (E) Billed Number Screening - this feature is designed to permit operator systems to disallow incoming collect and third number calls to the BPAL line when such calls originate within the continental United States and when such calls are processed through the national data base known as Billing Validation Application.
