P.S.C. Tariff No. 3 – Access
Date Effective: November 30, 2016

Original Leaf 101
Revision 0
Supersedes Revision 0

INTRASTATE ACCESS SERVICE

6. Switched Access Service (cont'd)

6.2 Undertaking of the Company (cont'd)

6.2.2 Transmission Specifications (cont'd)

The transmission specifications concerning Switched Access Service are limits which, when exceeded, may require the immediate corrective action of the Company. Acceptance limits are set forth in Technical Reference TR-NPL-000334. This technical Reference also provides the basis for determining Switched Access Service maintenance limits.

6.2.3 Provision of Service Performance Data

Subject to availability, end-to-end service performance data available to the Company through its own service evaluation routines, may also be made available to the Customer based on previously arranged intervals and format. These data provide information on overall end-to-end call completion and non-completion performance, e.g., Customer equipment blockage, failure results and transmission performance. These data do not include service performance data which are provided under other tariff sections, e.g., testing service results. If data are to be provided in other than paper format, the charges for such exchange will be determined on an individual case basis.

6.2.4 Testing

A. Acceptance Testing

At no additional charge the Company will, at the Customer's request, cooperatively test at the time of installation, the following parameters: Loss, C-notched noise, 3-tone slope, d.c. continuity and operational signaling. When the Local Transport is provided with Interface Groups 2 through 10, and the Transport Termination is two-wire (i.e., there is a four wire to two-wire conversion in Local Transport), balance parameters (equal level echo path loss) may also be tested.
