INTRASTATE ACCESS SERVICE

6. Switched Access Service (cont'd)

6.4 Rate Regulations (cont'd)

6.4.1 Description and Application of Rates and Charges (cont'd)

B. Nonrecurring Charges (cont'd)

3. Service Rearrangements (cont'd)

Changes and additions to existing Switched Access Services which are necessary due to Company initiated network reconfigurations, and required to provide the same grade of service to the Customer that existed prior to the reconfiguration, will be made without charge to the Customer. Charges will apply to those changes and additions which are in excess of those required to provide the same grade of service and/or capacity. Grade of service will be as determined by industry standard engineering tables. Changes to the point in time when the off-hook supervisory signal is provided in the originating call sequence i.e., when the off-hook supervisory signal is changed from being provided by the Customer's equipment before the called party answers to being forwarded by the Customer's equipment when the called party answers or vice versa, are subject to the Access Order Charge as set forth in the Company's rate schedule.

For additions, changes or modifications to an optional feature which has a separate nonrecurring charge, that nonrecurring charge will apply.

For additions, changes, or modifications to optional features that do not have their own separate nonrecurring charges, an Access Order Charge as set forth in the Company's rate schedule will apply. When an optional feature is not required on each transmission path, but rather for an entire transmission path group, an end office or an access tandem switch, only one such charge will apply (i.e., it will not apply per transmission path).
