## INTRASTATE ACCESS SERVICE

### 6. Switched Access Service (cont'd)

#### 6.1 General (cont'd)

##### 6.1.3 Rate Categories (cont'd)

##### A. Originating Local Transport (cont'd)

The Local Transport Termination rate will also apply if the IC serving wire center and the end user serving wire center are collocated. The Local Transport Termination rate will apply once to each Switched Access Service. The Local Transport Facility rate provides for the frequency transmission path and for that portion of the Local Transport which extends beyond the Company end office and includes both the physical (or derived) outside plant facilities and necessary transmission equipment (repeaters, etc.) including that which may be found at intermediate offices. The Local Transport Facility rate will not apply if the IC serving wire center and the end user serving wire center are collocated.

Notwithstanding the preceding paragraph, when more than one Company is involved in providing the Switched Access Service, the Local Transport rates are applied as set forth in Section 2.4.7 preceding.

Local Transport is provided at the rates and charges set forth in the Company's rate schedule.

##### 1. Interface Groups

Ten Interface Groups are provided for terminating the Local Transport at the Customer's designated premises. Technical specifications concerning the available interface groups are set forth in Section 15.1 following.
