INTRASTATE ACCESS SERVICE

6. Switched Access Service (cont'd)

6.1 General (cont'd)

6.1.3 Rate Categories (cont'd)

A. Originating Local Transport (cont'd)

3. Chargeable Optional Features (cont'd)

The Vertical Feature Query provides the same Customer identification function in addition to vertical features which may include: (1) call validation (ensuring that calls originate from subscribed service areas); (2) POTS translation of 800 numbers (which is generally necessary for the routing of 800 calls); (3) alternate POTS translation (which allows subscribers to vary the routing of 800 calls based on factors such as time of day, place or origination of the call, etc.); and (4) multiple carrier routing (which allows subscribers to route to different carriers based on factors similar to those in (3).

B. Originating End Office

The Originating End Office rate category establishes the charges related to the local end office switching and end user termination functions necessary to complete the transmission of Switched Access communications to and from the end users served by the local end office. The end Office rate category includes the Local Switching, Information Surcharge and ANI rate elements.

1. Local Switching

The Local Switching rate element establishes the charges related to the use of end office switching equipment, the terminations in the end office of end user lines, and the terminations of calls at Company Intercept Operators or recordings.
