INTRASTATE ACCESS SERVICE

6. Switched Access Service (cont'd)

6.4 Rate Regulations (cont'd)

6.4.6 Mileage Measurement (cont'd)

Mileage rates are set forth in the Company's rate schedule. To determine the rate to be billed, first compute the airline mileage using the V&H coordinates method. If the calculation results in a fraction of a mile, always round up to the next whole mile before determining the mileage and applying the rate. Then multiply the mileage by the appropriate rate.

Exceptions to the mileage measurement rules are as follows:

A. Five-Mile Rule

When a non AT&T Customer designated premises is within five miles of an AT&T Class 4 office, the Local Transport mileage for a call which is carried over a Switched Access service, originating or terminating through an end office switch, shall be the distance as would be determined from that end office switch to the serving wire center for that AT&T Class 4 office unless the Customer specifies that for an entire LATA, it wants all measurements determined from its serving wire center.

This designation (i.e., which serving wire center to use in calculating mileage) may be changed only once in any 12 month period. Such change will be made without charge(s) to the Customer.
