INTRASTATE ACCESS SERVICE

6. Switched Access Service (cont'd)

6.4 Rate Regulations (cont'd)

6.4.1 Description and Application of Rates and Charges (cont'd)

C. Application of Rates (cont'd)

4. 800 Database Access Service

A Basic Query or Vertical Feature Query charge applies for each query that is launched to an 800 database and identifies the Customer to whom the call will be delivered. Query charges, as set forth in the Company' rate schedule, will only be applied by those companies whose wire centers are identified as assessing query charges in the National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4.

When FGD switched access service is used for the provision of 800 Database Access Service and the total minutes of use and/or count of queries can be determined for each Customer at tandem or SSP but cannot be determined by individual end office, an allocation method will be utilized to determine minutes of use and/or queries by end office and Customer. For each end office a ratio will be developed and applied against the total minutes of use and/or count of queries for a given Customer as determined by the tandem or SSP. These ratios will be developed by dividing the unidentified originating minutes of use in all end office subtending the tandem or SSP.

D. Specification of Rates

1. Rates for all intrastate access services except terminating intrastate switched access minutes are set forth in the Rates and Charges Attachment to this Tariff.
2. For terminating switched access rates, see Verizon New York FCC Tariff No. 11.
