## INTRASTATE ACCESS SERVICE

### 6. Switched Access Service (cont'd)

#### 6.1 General (cont'd)

##### 6.1.3 Rate Categories (cont'd)

##### A. Originating Local Transport (cont'd)

The Company will work cooperatively with the Customer in determining (1) whether the service is to be directly routed to an end office switch or through an access tandem switch, and (2) the directionality of the service. Unless otherwise ordered by the F.C.C., where the Company elects to provide equal access through a centralized equal access arrangement, the Company will designate the serving wire center. The designated SWC will normally be that wire center which provides dial tone to the Company centralized Equal Access tandem office identified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO.4. When service is provided in cooperation with a non-Company provider of centralized Equal Access, the SWC will be that wire center which would normally provide dial tone to the Company point of interconnection with the non-Company provider of centralized Equal Access specified in the tariff of the centralized Equal Access provider. Those Company offices providing equal access through centralized arrangements are identified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARRIFF F.C.C. NO. 4.

Originating Local Transport rates are made up of a Local Transport Termination rate which is assessed on a per transmission path per access minute basis, and a Local Transport Facility rate assessed on a per mile per access minute basis. The Local Transport Termination rate provides for the communications frequency transmission path at the Company switching office and includes the Local Transport portion of Central Office Switching and Central Office Circuit equipment (e.g., signaling, transmission devices, padding, carrier channels, etc.)

The Local Transport Termination rate for FGD is applied at the end office.
