## INTRASTATE ACCESS SERVICE

### 17. Definitions (cont'd)

#### Expected Measured Loss

The term “Expected Measured Loss” denotes a calculated loss which specifies the end-to-end 1004-Hz loss on a terminated test connection between two readily accessible manual or remote test points. It is the sum of the inserted connection loss and test access loss including any test pads.

#### First Point of Switching

The term “First Point of Switching” denotes the first Company or centralized equal access provider location at which switching occurs on the terminating path of a call proceeding from the Customer designated premises to the terminating end office and, at the same time, the last Company or centralized equal access provider location at which switching occurs on the originating path of a call proceeding from the originating end office to the Customer designated premises.

#### Frequency Shift

The term “Frequency Shift” denotes the change in the frequency of a tone as it is transmitted over a channel.

#### Grandfathered

The term “Grandfathered” denotes Terminal Equipment, Multi-Line Terminating Systems and Protective Circuitry directly connected to the facilities utilized to provide services under the provision of this tariff, and which are considered grandfathered under Part 68 of the F.C.C.’s Rules and Regulations.

#### Host Central Office

The term “Host Central Office” denotes an electronic local Company End office where Telephone Exchange Service Customer station loops are terminated for purposes of interconnection to each other and to trunks. Additionally, this type of End Office contains the central call processing functions which service itself and its Remote Switching Module/Systems.
