INTRASTATE ACCESS SERVICE

6. Switched Access Service (cont'd)

6.8 Identification and Rating of VOIP-PSTN Traffic (Cont'd)

C. Calculation and Application of Percent-VOIP-Usage Factor

The Company will determine the number of toll-VOIP traffic minutes of use ("MOU") to which it will apply its interstate rates under subsection (B) above, by applying an originating Percent VOIP Usage ("OPVU") factor to the total intrastate access MOU originated by a Company end user and delivered to the customer and by applying a terminating PVU ("TPVU") factor to the total intrastate access MOU terminated by a Customer to the Company's end user. The OPVU and TPVU will be derived and applied as follows:

1. The Customer will calculate and furnish to the Company an OPVU factor, along with supporting documentation, representing the whole number percentage of the customer's total originating intrastate access MOU that the Customer receives from the Company in the State that is originated by the Company in IP format.
2. The Customer will calculate and furnish to the Company a TPVU factor, along with supporting documentation, representing the whole number percentage of the Customer's total terminating intrastate access MOU that the Customer exchanges with the Company in the State that is sent to the Company and originated in IP format.
3. The OPVU, TPVU and supporting documentation shall be based on information that is verifiable by the Company including but not limited to the number of the customer's retail VOIP subscriptions in the state (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information. The customer shall not modify its reported PIU factor to account for VOIP-PSTN traffic.
