

PSC No: 16 - Gas  
Rochester Gas and Electric Corporation  
Initial Effective Date: July 1, 2016  
Issued in compliance with Order in Case 15-G-0286, dated June 15, 2016

Leaf No. 127.41.1  
Revision: 2  
Superseding Revision: 0

## GENERAL INFORMATION

### 10. GENERAL RETAIL ACCESS (Cont'd)

#### G. Gas Balancing Service (Cont'd)

##### C) S.C. No. 5, S.C. No. 7 (annual use less than 35,000 therms), and S.C. No. 9 Balancing Service (Cont'd)

###### 6. Calculation of Daily Usage

After the close of each gas day, the Company shall calculate an  $ETU_{Actual}$  based upon the Customer's load profile and the weather that actually occurred during the gas day. The Company shall then aggregate the load of all Customer service points within the ESCO's Balance Control Account to arrive at the total amount of gas used by the ESCO's Balance Control Account for the gas day. This  $ETU_{Actual}$  shall be compared to the ESCO's scheduled Empire nomination to determine if the gas delivered created a negative CSC measurement. If a negative CSC measurement occurs the ESCO shall be subject to a cash out as set forth in Rule 10.G.(C).
