

Effective Date: 07/01/2016

PSC NO: 119 ELECTRICITY  
NEW YORK STATE ELECTRIC & GAS CORPORATION  
Initial Effective Date: 07/01/16  
Issued in compliance with Order in Case 15-E-0283, dated June 15, 2016

Leaf: 16  
Revision: 4  
Superseding Revision: 2

**GENERAL INFORMATION**

## 2. How Service May Be Obtained: (Cont'd.)

## C. Underground Extensions for New Residential Subdivisions: (Cont'd.)

## (3) Service Connection:

The Company shall designate the service connection point to a building or to a multiple occupancy building and the point at which the service lateral shall connect to the Company's electric distribution lines or equipment. Each service lateral within the lot line and running to each building shall be installed by the applicant in accordance with the Company's specifications.

## (4) Excessive Costs:

If the Company receives an application for underground service and the estimated per foot cost of installation for the subdivision is greater than two times the charge per foot filed with the Public Service Commission, the Company or applicant may petition the Public Service Commission to allow overhead service. The petition shall set forth the relevant economic, engineering, or environmental factors. If the necessary facilities are proposed to be in a VSR, the procedures set forth in 16 NYCRR Part 99.2 shall apply. If the residential subdivision is located within the Adirondack Park, the utility shall send a copy of the petition to the Adirondack Park Agency.

## (5) Connection to Supply System

The connection from the existing electric distribution system to the underground distribution lines installed within the applicant's subdivision shall be made by the Company.

Allowances, as stated in 2.B.(6)(a), shall be applied to the distribution line within the subdivision and service lines in the subdivision, in that order, unless a governmental requirement mandates the supply line to be placed underground, in which case such allowances shall be applied to the supply line first. Any underground line extension requirements to provide service to the applicant, that exceed the designated allowances, shall be constructed by the Company, but shall require a contribution by the applicant.

Where any part of the supply line, in excess of that portion included in the Company's allowance, is to be placed overhead, an applicant must submit a written application to the Company at least 75 days prior to the projected commencement of the construction of the supply line. The Company must report such projected construction to the Commission no later than 45 days before such construction is commenced. The Commission reserves the right to require the underground installation of particular lines, on the basis of the relevant economic, engineering, or environmental factors.

In the event the Company either intends, at its own discretion, or is required pursuant to this tariff to place underground connecting supply lines between an existing electric system and the underground distribution lines installed within an applicant's residential subdivision, the Company shall inform the telephone company and cable television company serving the area in which the residential subdivision is located. If a new common access route from the existing electric system to the residential subdivision shall be used, the connecting supply lines of the utility and the telephone company and cable television company shall be placed underground.

If a governmental authority having jurisdiction to require undergrounding, has required that underground facilities be installed, the Company shall furnish and construct, when necessary, an amount of underground supply circuit from the boundary line of the subdivision to the Company's existing distribution system. The "supply line" shall be charged by actual costs as specified in the URD Statement at the end of this Schedule (P.S.C. No. 119 – Electricity).
