Superseding Revision:

GENERAL INFORMATION

14. Glossary:

Non-Spinning Reserves: Generation not connected to the system but capable of being brought on-line to serve additional demand within a specified period of time.

North American Electric Reliability Council ("NERC"): A council formed in 1968 to promote the reliability and adequacy of the bulk power supply by the electric systems of North America.

Northeast Power Coordinating Council ("NPCC"): One of nine NERC regions. Its purpose is to promote maximum reliability and efficiency of electric service in the interconnected systems of the signatory parties by extending the coordination of their system planning and operating procedures.

NYISO Open Access Transmission Tariff ("NYISO OATT"): The tariff filed with and approved by FERC as the same may be revised, modified, amended, clarified, supplemented or superseded, that sets forth the rates, terms and conditions under which the NYISO provides open access transmission service.

NYISO Tariffs: The NYISO OATT (defined above) and the NYISO Market Services Tariff, as well as NYISO technical bulletins, procedures and any other guidelines issued by the NYISO that set forth the rates, terms and conditions under which the NYISO provides open access transmission services.

One Line Diagram: A diagram which shows by means of single lines and graphic symbols, the connections between major three phase components of a generation station or substation.

Parallel Generation Facilities: Power producing equipment connected to the electric system and operated in conjunction with the Company's electric transmission and distribution system.

Parties: The Company and the ESCO receiving service under this Tariff.

Payment: Is considered to be made on the date when it is received by the Company or one of its authorized collection agents.

Point of Supply: The point (or connection) where the Company's Distribution Lines and/or Company-owned Service Lines end and the Customer-owned facilities begin.

Power Exchange ("PE"): A corporation to provide a vehicle through which buyers and sellers may participate in the markets for Energy, Capacity and Ancillary Services. PE's may be formed after establishment of the NYISO.

Power Quality: Concerns of voltage deviations, harmonic distortions and power interruptions experienced by the Customer or Company that can damage, or adversely affect operation of Customer or Company equipment.

Public Right-of-Way: The area within the territorial limits of any street, avenue, road or way that is for any highway purpose under the jurisdiction of the State of New York or of the legislative body of any county, city, town or village that is open to public use and that may be used for the placement of utility facilities.
