Leaf: 58
Revision: 0
Superseding Revision:

INTRASTATE COMMUNICATIONS SERVICES

SECTION 5 – EMERGENCY SERVICES (CONT'D)

5.1 9-1-1 Emergency Services (Cont'd.)

5.1.4 9-1-1 Exchange Access

9-1-1 Exchange Access provides one way call delivery trunks from the 9-1-1 Routing Service to the PSAP. The 9-1-1 Exchange Access trunks are conditioned to allow delivery of ANI to the PSAP. They also allow signaling from the PSAP to the 9-1-1 Routing Service to invoke special features of the 9-1-1 Routing Service, such as transfer, speed dialing, etc.

5.1.5 ALI Data Access Connections

ALI Data Access Connections provide the PSAP network access to the ALI Database for ALI Delivery.

5.1.6 Diverse Facility Routing

Upon Customer request, and where facilities are available, West Safety will arrange for diverse routing over alternate voice and/or data paths to reduce the potential for service failure as a result of an interruption of transport facilities.
