GENERAL INFORMATION (Cont'd)

II.36. WEATHER NORMALIZATION ADJUSTMENT

The rates for gas service to all customers under SC 1, SC 2, SC 3, SC 4 and SC 5 shall be subject to a Weather Normalization Adjustment to reflect the impact of degree day variations from normal levels, as determined on a revenue month basis, for the months of October through May, inclusive.

The monthly volume deviation shall be computed for each billing period for which adjustment is made using the formula described below. The weather adjustment is made by adding to or subtracting from the Customer's bill the amount determined by multiplying the Customers consumption during the billing period by the weather adjustment factor.

$$WA = \frac{(R * DDF * (NDD - ADD))}{(BL + (DDF * ADD))}$$

where,           WA    =    Weather adjustment factor, \$/Mcf  
                  DDF   =    Average degree day factor, Mcf/degree-day  
                  BL    =    Average base load, Mcf  
                  ADD   =    Actual degree days for the billing period  
                  NDD   =    Normal degree days for the billing period  
                  R     =    Tailblock margin by service class

<u>MONTH</u>	<u>DEGREE DAY FACTOR FOR THE PERIOD ON AND AFTER APRIL 2017</u>	<u>AVERAGE BASELOAD, BL</u>
OCTOBER	.010729	2.791
NOVEMBER	.012692	2.791
DECEMBER	.015002	2.791
JANUARY	.015156	2.791
FEBRUARY	.015656	2.791
MARCH	.015539	2.791
APRIL	.014570	2.791
MAY	.013214	2.791
