Consolidated Edison Company of New York, Inc.
Initial Effective Date: 07/21/2016

Leaf: 167.1
Revision: 1
Superseding Revision: 0

GENERAL RULES

20. Standby Service - Continued

20.5 Delivery Charges under Standby Service Rates - Continued

20.5.3 – Continued

A Customer seeking a Credit must request such Credit by October 1 of each year for which the credit is sought and, at the same time, specify the Outage Events the Customer requests to be excluded from the Measurement Period. If October 1 falls on a weekend or holiday, the Company will accept requests until the next business day. If service is taken under the Multi-Party Offset provision of General Rule 20.2.1(B)(8), the Credit will be applied to the Recipient Account in the Sponsor's name; provided, however, that if the Sponsor has more than one Recipient Account in its name, the credit will be applied to the Sponsor's account having the highest Contract Demand.

The Credit for any Measurement Period, except for Customers billed under the Multi-Party Offset provision of General Rule 20.2.1(B)(8), will be equal to the product of: (a) the lesser of the lowest kW recorded on the Output Meter during the Measurement Period or the Customer's Contract Demand and (b) the Contract Demand Delivery Charge per kW that is in effect on October 1 of the year in which the Credit is determined (as reduced by the credit shown on the Statement of Temporary Rate Adjustment pursuant to General Rule 26.8, if applicable).

If the Customer is billed under the Single Party Offset provision of General Rule 20.2.1(B)(8), the kW to be credited on each Standby Service account supplied by the generating facility's output will be based on the total kW to be credited multiplied by the ratio of the Contract Demand on the Standby Service account to the aggregated Contract Demands on all the Standby Service accounts supplied by the generating facility's output.

If service is taken under the Multi-Party Offset provision of General Rule 20.2.1(B)(8), the Credit for any Measurement Period will be equal to the product of: (a) the lesser of the lowest kW recorded on the Output Meter during the Measurement Period or the aggregated Contract Demands of the Recipient Accounts as of October 1 and (b) the Contract Demand Delivery Charge per kW that is in effect on the Sponsor's Recipient Account on October 1 of the year in which the Credit is determined (as reduced by the credit shown on the Statement of Temporary Rate Adjustment pursuant to General Rule 26.8, if applicable).

The Credit will be applied to the Customer's successive 12 monthly bills commencing in November until the following October.

Issued by: Robert Hoglund, Senior Vice President & Chief Financial Officer, New York, NY
