Revision: 7
Superseding Revision: 5

GENERAL RULES

20. Standby Service - Continued

20.2 Interconnection and Operation - Continued

20.2.1(B)(8)(e) – Continued

(1) For Accounts Supplied Under The Multi-party Offset - Continued

“Percentage Allocation” means the percentage of the generating facility’s output that the Sponsor has allocated to each Recipient Account under the Multi-party Offset. A single percentage will be applied to both the Allocated As-used Generator Demand and the Allocated Generator Supply. The Percentage Allocations must total 100 percent, of which the Sponsor must establish: (a) a Percentage Allocation of 10 percent or more to a single Recipient Account in the Sponsor’s name; and (b) a Percentage Allocation of no less than 5 percent or more than 90 percent to each additional Recipient Account. The Recipient Accounts and the Percentage Allocation to each must be assigned in writing by the Sponsor, using the Multi-Party Offset Percentage Allocation Form found on the Company’s website, at least 30 days before commencing service under the Multi-party Offset. The Percentage Allocations and the Recipient Accounts may be changed as described on the Form. No credits will be applied if the Sponsor ceases to have a Recipient Account or ceases to own or operate the generating facility. If a Recipient Account is closed, its credits will be forfeited unless the Company receives a new Form within 30 days of the account’s closure.

(2) Each account supplied by the generating facility’s output will be billed under Standby Service rates, as modified below:

- (i) An additional Customer Charge of \$50.00 per account per billing period, exclusive of the Increase in Rates and Charges, will be applicable to cover incremental billing and administrative costs associated with providing service under this provision.
- (ii) The per-kWhr delivery charges and adjustments described in General Rule 26 will be applied to the total kilowatt-hours registered on the account’s meter(s) reduced by the Allocated Generator Supply for each 15-minute interval (adjusted for losses as applicable).
- (iii) For each 15-minute interval, the registered demand on the account’s meter(s) will be reduced by the Allocated Generator Demand for purposes of determining the daily maximum demand that is used for billing As-used Daily Demand Delivery Charges.
- (iv) If the Customer purchases supply from the Company, the per-kWhr supply charges and adjustments described in General Rule 25 will be applied to the total kilowatt-hours registered on the account’s meter(s) reduced by the Allocated Generator Supply for each 15-minute interval (adjusted for losses as applicable).
- (v) Monthly Communications Service Credit: Each Standby Service account will receive a credit of \$44.78 per month to reimburse the Customer for maintaining the communications service if the Company would have otherwise been required to maintain the communications service under General Rule 6.5 if not for service being taken under General Rule 20.2.1(B)(8).
