

PSC NO: 1 ELECTRICITY  
COMPANY: VILLAGE OF WESTFIELD  
INITIAL EFFECTIVE DATE: 6/22/16

LEAF: 16  
REVISION: 0  
SUPERSEDING REVISION:

### SERVICE CLASSIFICATION NO.7 (cont.)

the single point of contact for the applicant (unless the utility informs the applicant otherwise) in coordinating the potential applicant's project with the utility.

### FILING OF AN APPLICATION

The potential applicant must submit application to the Village of Westfield. The submittal must include a copy of equipment certification to UL 1741, latest revision, as applicable, a three line diagram specific to the proposed system, a letter of authorization (if applicant is agent for the customer), and payment of a \$50 application fee. If the applicant proceeds with the project to completion, the application fee will be applied as a payment to the utility's total cost for interconnection, including the cost of processing the application.

Within five (5) business days of receiving the application, the utility will notify the applicant of receipt and whether the application has been completed adequately. It is in the best interest of the applicant to provide the utility with all pertinent technical information as early as possible in the process. If the required documentation is presented in this step, it will allow the utility to perform the required reviews and allow the process to proceed as expeditiously as possible.

### UTILITY COMPLETES THE COORDINATED ELECTRIC SYSTEM INTERCONNECTION REVIEW (CESIR)

A CESIR will be performed by the utility within fifteen (15) business days after receipt of application to determine if the proposed generation on the circuit results in any relay coordination, fault current, and/or voltage regulation problems.

The CESIR will consist of two parts:

1. Review of the impacts to the utility system associated with the interconnection of the proposed system, and
2. Review of the proposed system's compliance with the applicable criteria set forth below.

Upon completion of the CESIR, the utility will provide the following, in writing, to the applicant:

1. utility system impacts, if any;
2. notification of whether the proposed system meets the applicable criteria considered in the CESIR process;
