

PSC NO: 10 – Electricity	Leaf: 249
Consolidated Edison Company of New York, Inc.	Revision: 3
Initial Effective Date: 04/01/2017	Superseding Revision: 2
Issued in compliance with Order in Cases 15-E-0751 and 15-E-0082 dated 03/09/2017	

GENERAL RULES

24. Service Classification Riders (Available on Request) – Continued

RIDER R - Net Metering for Customer-Generators - Continued

D. Requirements for Parallel Operation - Continued

8. Except as specified in General Rules 8.1 and 8.2 of this Rate Schedule, if there is a generator on the premises in addition to the solar, farm waste, wind, micro-CHP, micro-hydro, or fuel cell electric generating equipment eligible for net metering, the Customer will not qualify for service under this Rider unless the Customer segregates the additional equipment and associated load so that it is not served under this Rider. If a Customer has solar, wind, and/or micro-hydro electric generating equipment as well as micro-CHP and/or fuel cell electric generating equipment, each eligible for service under this Rider, the Customer will qualify for service under this Rider only if the load served by the residential micro-CHP and/or fuel cell electric generating equipment is not served under the same net-metered account as the load served by the solar, wind, and/or micro-hydro electric generating equipment. If a non-residential Customer has farm waste electric generating equipment as well as solar, wind, and/or micro-hydroelectric generating equipment at its Non-farm Location, the Customer will qualify for service under this Rider only if the load served by the farm waste electric generating equipment is not served under the same net-metered account as the load served by the solar, wind and/or micro-hydroelectric generating equipment.

Only Customers billed under energy-only rates may qualify for service under this Rider if there is energy storage on the premises in addition to the electric generating equipment eligible for net metering, provided the energy storage supplies energy to a single account behind the same meter as the generating equipment.

9. Prior to commencing service under this Rider, a Customer with micro-CHP generating equipment must submit technical documentation, acceptable to the Company, establishing that the equipment meets the requirements specified in Public Service Law Section 66-j and in the Standardized Interconnection Requirements. No more than once annually thereafter, the Company may require the Customer to submit technical documentation establishing continued eligibility. A Customer who fails to provide documentation acceptable to the Company within 30 days of a Company request will be deemed ineligible to participate under this Rider until the first billing cycle commencing after acceptable documentation is received.
