PSC NO: 10 – Electricity Consolidated Edison Company of New York, Inc. Initial Effective Date: 04/01/2017 Issued in compliance with Order in Case 15-E-0082 dated 03/13/2017

# Leaf: 249.2 Revision: 2 Superseding Revision: 1

## **GENERAL RULES**

### 24. Service Classification Riders (Available on Request) – Continued

### **RIDER R - Net Metering for Customer-Generators - Continued**

#### F. Remote Net Metering and Community Distributed Generation

2. Community Distributed Generation

Through April 30, 2016, Community Distributed Generation is available where: (a) the generating equipment is located within a CDG Opportunity Zone shown on the Company's website or (b) a minimum of 20 percent of the CDG Satellites are SC 1 Customers enrolled in the Company's low-income program. Thereafter, CDG will be available throughout the service territory.

A "CDG Host" is defined as a non-residential Customer that owns or operates electric generating equipment eligible for net metering under this Rider and whose net energy produced by its generating equipment is applied to the accounts of other electric Customers ("CDG Satellites") with which it has a contractual arrangement related to the disposition of net metering credits.

a. Applications by CDG Hosts

The CDG Host shall designate in its initial application for CDG service the CDG Host Account and CDG Satellite Accounts that will receive net metered service under CDG. The CDG Host must designate no fewer than ten CDG Satellite Accounts unless all the CDG Satellite Accounts are located on the site of the same property as the CDG Host serving residential and/or non-residential customers. No more than 40 percent of the output of the CDG Host may serve CDG Satellites of 25 kW or greater; provided, however, that the CDG Host may treat each dwelling unit served indirectly under SC 8 or SC 12 as though it were a separate participant for determining whether the ten-CDG Satellite Account minimum and 40-percent output limit are reached. Each CDG Satellite Account must take a percentage of the output of the CDG Host's excess generation. The percentage must amount to at least 1,000 kWh annually but may not exceed the CDG Satellite Account's historic average annual kWh usage (or forecast usage if historic data is not available). The CDG Host, by submitting a completed application to the Company, is certifying that its project meets the PSC's eligibility requirements specified in its Order issued July 17, 2015, in Case 15-E-0082 and as may be revised thereafter.

The CDG Host must be a non-residential Customer with farm waste, solar, wind, micro-hydroelectric or fuel cell electric generating equipment. The CDG Host Account and all associated CDG Satellite Accounts must be located within the same NYISO zone and within the Company's service territory. A CDG Satellite Account shall have only one CDG Host Account. The CDG Satellite Account shall not be a net metered customer-generator or a Remote Net Metered Host or Satellite Account or take Standby Service or service under SC 11.

A CDG Host Account shall not be a Remote Net Metered Host or Satellite Account. If the CDG Host Account was previously established under Remote Net Metering as an energy-only account whose Satellite Accounts receive monetary crediting pursuant to paragraph 2.c.(iii) of Section G of this Rider, the CDG Host must permanently surrender its rights to monetary crediting under an energy-only SC before participating in CDG. If the CDG Host account was previously established as a net metered customer-generator or Remote Net Metered Host, it must forfeit any remaining kWhr credits at the time it becomes a CDG Host.
