LOCAL AND INTEREXCHANGE TELECOMMUNICATIONS SERVICES

SECTION 11 – OBSOLETE SERVICES (CONT'D.)

11.1 Primus Telecommunications Services (Cont'd.)

11.1.25 PBX Trunk Service

General Analog and/or digital PBX trunks are provided for connection of customer provided PBX terminal equipment. Analog trunks are delivered on a DSO level and digital trunks are delivered at the DS 1 level. All trunks are equipped with multiline hunting.

DID service allows callers to reach the called party without going through a PBX attendant. DOD service allows end users to dial outside of a PBX system without going through the PBX attendant to get access to an outside line. Digital trunks cannot be two-way trunks, but must be ordered as with either Direct Inward Dialing (DID) or Direct Outward Dialing (DOD).

For DID configured PBX trunks additional charges apply for Direct Inward Dial Station numbers.

Each Analog Trunk has the following characteristics:

Terminal Interface:	2-wire or 4-wire, as required for the provision of service
Signaling Type:	Loop, Ground, E&M I, II, III
Pulse Type:	Dual Tone Multi-Frequency (DTMF)
Directionality:	In-Coming Only (DID), Out-Going Only (DOD), or Two-Way
