

P.S.C. No. 1 – Water  
SUEZ Water New York Inc.  
Initial Effective Date: February 1, 2017

Leaf No. 38  
Revision: 0  
Superseding Revision:

## GENERAL INFORMATION

F. Water service may be discontinued by the Company for refusal to grant access for the aforementioned purposes,

(a) where the Company has a reasonable basis to believe, from the nature or use of such premises, that a determination should be made as to the existence, non-existence or degree of contamination hazard or

(b) where the activities there are comparable or similar to those of typical establishments listed in the State Department of Health guidelines as requiring protective devices. However, the Customer will not be subject to discontinuance if, upon the refusal to provide access, he provides a certification by a professional engineer (or architect) licensed and registered in New York State that a backflow prevention device that meets the requirements of the Company and the State Department of Health has been installed; or, in the alternative, the Customer provides a certification by a professional engineer (or architect) licensed and registered in New York State that such device is unnecessary at the premises. Such certification must be to the satisfaction of the Company.

G. The Company may discontinue service to a Customer's premises forthwith in the event of an actual or imminent contamination, pending its abatement, where such contamination threatens the health or safety of persons or the Company's water supply.

### 8.7 Interference with Company Property Prohibited

No person is permitted to turn the water on or off at any street valve, corporation stop or curb stop, or other street connection, or disconnect or remove any meter without the consent of the Company.

### 8.8 Access to and Removal of Company Equipment

#### A. Inspection and Examination

The Company has the right to enter, at all reasonable times, any location supplied with service by it, for the purposes of inspecting, examining, reading, testing, repairing and removing all of its equipment related to the provision of such service, except that it will not enter locked premises without the permission of the person lawfully in control, unless explicitly authorized by court order, or when an emergency may threaten the health or safety of a person, or the surrounding area of the utility's distribution system.

Field inspections shall be conducted as required by 16 NYCRR S.14.18.

Issued in compliance with the Commission Order 16-W-0130 dated January 24, 2017
