GENERAL RULES**Application Forms – Continued****Form G – Application for Net Metering or Standby Service and/or Buy-Back Service- Continued****Section 5. If you request Standby Service – Continued****F. Contract Demand**

Contract Demand can be set by you or by the Company, as described in General Rule 20.4.3 of the rate schedule. The Company will determine your Contract Demand unless you state your Contract Demand below. The Contract Demand set by a Customer is subject to review and approval by the Company unless the generation is installed at an existing premises with no increase in load or capacity requirements for an account other than one requesting service under General Rule 20.2.1(B)(7) or General Rule 20.2.1(B)(8). Check below if applicable:

☐ The generator is being installed at an existing premises with no increase in load or capacity requirements.

If you set your own Standby Service Contract Demand, please specify:

- Contract Demand, unless you request service under General Rule 20.2.1(B)(8):
(Low Tension) _____ kW or (High Tension) _____ kW
- Contract Demand for each account to be served, if you request service under the Single Party Offset pursuant to General Rule 20.2.1(B)(8):

<u>Account #</u>	<u>Service Address</u>	<u>Contract Demand kW</u>	<u>Low Tension or High Tension</u>
------------------	------------------------	---------------------------	------------------------------------

(Attach a sheet if you have additional accounts.)

If service is requested under the Multi-Party Offset pursuant to General Rule 20.2.1(B)(8):

- (a) Each Customer that will receive an allocation of the generating facility's output ("Recipient Account") must complete and sign a Multi-party Offset Recipient Participation Form, which includes space for the Customer to set its own Contract Demand, and provide it to the Sponsor to submit with this application Form G.
- (b) The Sponsor must complete and submit a signed Multi-Party Offset Percentage Allocation Form, which includes identification of the Recipient Accounts and the percentage of the generator's output to be allocated to each.
