COMPANY: KEYSpan GAS EAST CORP. DBA BROOKLYN UNION OF L.I. REVISION: 15
INITIAL EFFECTIVE DATE: 01/01/17 SUPERSEDING REVISION: 14
STAMPS: Issued in Compliance with Order in Case 16-G-0058 issued December 16, 2016

SERVICE CLASSIFICATION No. 4
Interruptible Gas Service

Rate Codes: 310-Category A
310A- Category DSRS
311-Category C
320-Category B
321-Category D

Applicable to Use of Service for:

Service is available under this Service Classification for provision of natural gas to commercial and industrial Customers who by written contract agree to:

- (i) use the service furnished hereunder only in the equipment specified in said contract;
- (ii) not use in said equipment any gas service furnished by the Company other than the gas service furnished under this Service Classification or under Service Classification No. 7;
- (iii) In the event that the Company calls on peaking assets to supplement supply to meet high demand or for isolated distribution system reliability reasons in excess of four hours (other than for LNG plant idling or cooling or for system testing), or if the Company, at its sole discretion, determines that it is warranted to protect the reliability and safety of the system for firm Customers, the Company will interrupt service to Customers on this service classification. Interruptible customers may remain on gas when peaking supplies are dispatched in the following circumstances: 1) peaking supplies are dispatched ratably across a weekend and/or holiday with varying temperatures above and below 15° F; and 2) peaking supplies are dispatched based on a day ahead call option with forecast low temperature of 15°F or below, but the actual low temperature is higher than the forecast. In each case, Interruptible customers may be allowed to burn gas, in the Company's sole discretion, if system conditions permit. LNG and non-ratable peaking supplies will be minimized to preserve winter deliverability. The Company will endeavor to provide notification (within two hours) of a scheduled interruption in accordance with the Communications Protocol described in this service classification. Upon receipt of such notice, the Customer shall curtail or discontinue use of gas as instructed by the Company (See Special Provisions).
- (iv) provide and maintain complete and adequate standby facilities except as may be permitted by the Company in its sole discretion because of the nature of the Customer's operations; and
- (v) unless otherwise expressly authorized by the Company in writing, must have provable storage capacity and alternate fuel on hand to withstand interruptions of service for at least ten days at the beginning of the heating season. If Customer lacks sufficient storage to hold ten days of supply, Customer must enter the heating season with filled tanks and arrangement providing for replenishment of storage tanks such that the initial storage plus the replenishment equals the required storage inventory. This requirement is for Customers whose alternate fuel is distillate and non-distillate in the case of human needs Customers.
