The forecast rate allowance of SIR costs will be included in base delivery rates. The surcharge will be calculated annually and is limited to an amount no greater than two percent of the Company's prior year's aggregate revenues. The SIR recovery surcharge will include (i) the difference between actual SIR expense in the prior rate year and (ii) any amount that was not recovered in the prior rate year's SIR Recovery Surcharge because the cumulative difference between actual SIR costs and the forecast rate allowance did not exceed the \$25 million threshold and/or the amount would have increased the Company's aggregate revenues by more than two percent..
