1. Description (Cont'd.)

- Office Anywhere – Allows Customers to make it seem like they are using their office phone for outbound calls when they are working remotely. Calls made from the remote location show the Caller ID as being made from the Customer's office phone through Office Anywhere.
- Personal Attendant – Allows Customers to answer calls with a custom greeting and then offer up to two (2) call treatment options: go to voicemail, go to another telephone number or go to an announcement. This feature can be used to act as a simplified version of Auto Attendant to answer calls when a user is away from their desk or if the business is closed.
