Section 5 - SUPPLEMENTAL SERVICES (Cont'd)

5.2 ADVANCED CUSTOM CALLING SERVICES (Cont'd)

5.2.2 Description of Features (Cont'd)

f. Selective Call Rejection

Selective Call Rejection allows a user to create a list of up to twelve telephone numbers from which calls will not be accepted. The most recent incoming call can be added to the list even if the number is not known. When the feature is activated, a call from a number on the user's Selective Call Rejection list is routed directly to an announcement that it will not be accepted. Calls from other numbers complete normally. Using codes entered on the user's station set, the user can at any time: add numbers to or delete numbers from the Selective Call Rejection list, and activate or deactivate the feature.

g. Caller ID Number Only

Caller ID Number automatically displays a caller's number, if available, on the user's station set display.

h. Caller ID Name Only

Caller ID Name automatically displays a caller's name, if available, on the user's analog station set display.

i. Call Trace

Call Trace enables a user to trace the last incoming call in order to take legal action against the caller. The user traces the call by either entering an activation code or pressing a feature button on the station set immediately after its receipt. The call trace is transmitted over a data link to an authorized law enforcement agency. An announcement informs the user whether the trace was successful. The user can then contact the law enforcement agency to take legal action. The user does not receive the Call Trace information.
