Section 5 - SUPPLEMENTAL SERVICES (Cont'd)

5.3 CENTREX-TYPE SERVICE (Cont'd)

5.3.2 Legacy Centrex-Type Service Features

D. Call Transfer - All Calls

Call Transfer allows a station user to transfer an established call to another station. The station from which the call is transferred will be assessed any long distance charges incurred as a result of the transfer.

E. Directed Call Pickup with Barge-In

This feature answers calls directed to a specific line from any other telephone line in the user group.

F. Directed Call Pickup without Barge-In

This feature is identical to the Directed Call Pickup with Barge-In except, if the line being picked up has already been answered, the party dialing the pickup code is routed to reorder (i.e., fast busy) rather than permitted to barge in on the established connection and create a three-way call.

G. Distinctive Ringing

This feature enables a user to determine the source of an incoming call from a distinctive ring. The pattern is based on whether the call is from within the station group, external to the station group, forwarded from the attendant position, or from a station within the Call Waiting feature.
