

TelCove Operations, LLC

Leaf: 98

NY P.S.C. Tariff No. 1

Revision: 0

Initial Effective Date: January 13, 2017

Superseding Revision: 0

Section 4 - INTRALATA/INTERLATA TOLL USAGE AND MILEAGE CHARGES (Cont'd)

4.2.5 TOLL FREE SERVICE FEATURES (Cont'd)

- A. Basic Features for Switched (Basic and Stand Alone) and Dedicated Toll Free Services (Cont'd)

2. Area Code/Exchange Control

Area Code/Exchange Control allows blocking of incoming calls from selected NPA/NXX combinations. This feature allows customers to limit their toll free service to a geographic area by blocking calls from designated exchanges located outside the specified calling area.

- B. Enhanced Features for Switched (Basic and Stand Alone) and Dedicated Toll Free Services

Enhanced Routing Features improve call handling efficiency and productivity by routing traffic among multiple locations. Enhanced routing also provides quick and easy disaster recovery for critical applications. These features are used when more than one terminating number is involved for the toll-free number.

1. Reserved for Future Use

2. Area Code Routing

This feature provides the capability to divide the country into customer-defined routing sets. Calls to the same 800 number are directed to the terminating location based on the originating NPA. It is available to both dedicated and switched toll-free numbers.
