## Section 5 - SUPPLEMENTAL SERVICES (Cont'd)

### 5.1 OPTIONAL CALLING SERVICES (Cont'd)

#### 5.1.2 Description of Features (Cont'd)

##### E. Call Waiting Originating

Call Waiting Originating allows the subscriber to apply call waiting treatment to a busy called line for the duration of the call attempt. Use is restricted to the subscriber's inter-terminal group.

##### F. Distinctive Ringing

This feature enables a user to determine the source of an incoming call from a distinctive ring. The user is provided with up to two additional telephone numbers.

##### G. Multi-Line Hunting

###### Hunt Group

Hunting is used to search for an idle line within a pre-defined multi-line hunt group. Each line in the multi-line hunt group is assigned a member number used for hunting.

Regular (sequential) Hunting searches for an idle line beginning with the dialed member and continuing by increasing member number to the highest member number. If no idle line is found, a busy signal is returned.

Circular Hunting searches for an idle line beginning with the dialed member and continuing by increasing member number to the highest member number. If no idle line is found, hunting continues from lowest member number up to the member before the dialed number. If no idle line is found, a busy signal is returned.

Uniform Call Distribution Hunting searches for an idle line beginning with the member with the fewest number of completed calls and continuing with the member with the next higher number of completed calls. When two or more members have the same number of completed calls, the hunt is conducted from the lowest to the highest member number. If no idle line is found by the end of the hunting sequence, a busy signal is returned.
