## ACCESS SERVICE

### 4. SWITCHED ACCESS SERVICE (Cont'd)

#### 4.6 Obligations of the Customer (Cont'd)

##### 4.6.6 Jurisdictional Report Requirements (Cont'd)

(1) Percent Interstate Usage (PIU) and Intrastate IntraLATA Local Usage Percentage (LUP) Factors (Cont'd)

- (b) When the customer initially orders Switched Access Service(s) the customer will state in its order (Access Service Request) a Percent Interstate Usage and Intrastate IntraLATA Local Usage Percentage factor. This factor will be used by the Company as the customer-provided PIU and LUP factor until the customer provides updated PIU and LUP factors, as required in (A)(3) following.

The customer must report the percent of interstate use (PIU) and intrastate intraLATA percentage (LUP) by Feature Group and Call Type as follows:

For each service, the customer may provide separate PIU and LUP factors in accordance with (a) and (b) preceding.

- (c) For purposes of developing the projected interstate percentage for Feature Group D (or CST BSA – Option 3), the customer shall consider every call, that originates from a calling party in one state and terminates to a called party in a different state, to be interstate communications. The customer shall consider every call that terminates to a called party within the same state as the state where the calling party is located, to be intrastate communications. The manner in which a call is routed through the telecommunications network does not affect the jurisdiction of a call; i.e., a call between two points within the same state is an intrastate call even if it is routed through another state.
