ACCESS SERVICE

4. SWITCHED ACCESS SERVICE (Cont'd)

4.6 Obligations of the Customer (Cont'd)

4.6.6 Jurisdictional Report Requirements (Cont'd)

(1) Percent Interstate Usage (PIU) and Intrastate IntraLATA Local Usage Percentage (LUP) Factors (Cont'd)

There may be some portion of terminating minutes where it is not possible to know, and therefore to send, the needed originating number information. A “floor” of 7% will be set for terminating access minutes lacking originating number information for all switched access customers.

- (i) When the percentage of terminating traffic without sufficient call detail to determine jurisdiction does not exceed the sum of the floor plus a 2% grace threshold or 9%, the Company will apply the PIU factor, either provided by the customer or as set forth in section (A)(1)(b) or (A)(3).
- (ii) When the percentage is greater than 9%, the Company will assess rates from this tariff on all minutes exceeding the floor. For example, if 30% of a customer’s terminating minutes sent to the Company do not contain sufficient originating information to allow the Company to determine the originating location, then the Company would apply the provisions of this tariff to those minutes exceeding the “floor”, or 23% in this example.

In the event that the Company applies rates to terminating calls without originating number information as provided in this tariff, customers will have the opportunity to request backup documentation of the Company’s basis for such application, and further request that the Company change the application of the intrastate access rate upon a showing of why the intrastate rate should not be applied.
