## ACCESS SERVICE

### 4. SWITCHED ACCESS SERVICE (Cont'd)

#### 4.7 Rate Regulations (Cont'd)

##### 4.7.1 Description and Application of Rates and Charges (Cont'd)

###### (A) Time of Day Usage Rates

Time of Day usage rates are rates that apply only when a specific rate element is used. These are applied on a per access minute basis or a per call basis. In addition, usage rates applied on a per call basis for the 800 Access Service Customer Identification Charge and Automatic Number Identification Rates are not subject to Time of Day charges. Time of Day usage rates are accumulated over a monthly period. Time of Day usage rates apply to Switched Access Service as set forth for specific rate elements in 5.6 following. Usage rates for Tandem Switched Transport are arranged in pricing zones. The pricing zone for each serving wire center is specified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. No. 4.

###### (1) Time of Day

The time when the connection is established, determined in accordance with the time (standard or daylight saving) legally in use at the point where the calling station is located, determines whether day, evening or night rates apply.

Where usage begins in one rate period and ends in another, the rates in effect for the rate period in which such usage began will apply unless the local exchange carrier implements actual rate period billing, i.e., split rate period billing. When split rate period billing is available, usage which begins in one rate period and ends in another will be billed at the rates applicable to each such rate period.
