ACCESS SERVICE

4. SWITCHED ACCESS SERVICE (Cont'd)

4.1 General (Cont'd)

4.1.2 Rate Categories (Cont'd)

(A) Local Transport (Cont'd)

The Telephone Company will work cooperatively with the customer in determining (1) whether the service is to be directly routed to an end office switch or through an access tandem switch, (2) routed through a TOPS tandem switch, and (3) the directionality of the service. In addition, when the customer has ordered Feature Group D with the 64 kbps Clear Channel Capability (64CCC) optional feature(s), as set forth in 4.1.2(A)(2)(g) following, the Telephone Company will assure that these facilities are capable of supporting 64 kbps clear channel digital data as appropriate.

When the customer has ordered Feature Group D with the SS7 Signaling option, as set forth in 4.1.2(A)(2)(d) following, the Telephone Company will provide the option in accordance with the technical specifications set forth in Technical Publication TR-TSV-000905 and TR-TSV-000962.

The circuits and equipment used for Local Transport may be dedicated to a single customer (dedicated transport) or used in common by multiple customers (common transport).

For dedicated transport, the customer must order or have in place an Entrance Facility from the customer premises or a collocated interconnection location to the serving wire center of the customer premises or a collocated interconnection location.

The customer has the option of DS1 or DS3 Entrance Facility for Local Transport from the customer designated premises to the serving wire center of such customer designated premises.

The Local Transport rate category provides, for DS3 to DS1 or DS1 to Voice Multiplexing Optional Features.
