ACCESS SERVICE

4. SWITCHED ACCESS SERVICE (Cont'd)

4.1 General (Cont'd)

4.1.2 Rate Categories (Cont'd)

(A) Local Transport (Cont'd)

The Local Transport Termination rate provides for the termination of the voice frequency transmission path at the end office switch or at the access tandem for traffic that is switched at an access tandem. The Local Transport Termination rate also provides for the termination of the voice frequency transmission path at a host end office.

The Host/Remote Transport Termination rate provides for the termination of the voice frequency transmission path at a remote switching system (RSS) or a remote switching module (RSM).

The Local Transport Facility rate provides for that portion of the voice frequency transmission path between the end office and the access tandem.

The Host/Remote Transport Facility rate provides for that portion of the voice frequency transmission path between a host end office and a remote switching system (RSS) or remote switching module (RSM).

The Local Transport Tandem Switching rate provides for the use of the Telephone Company tandem switching facilities.

The Transport Multiplexing rate provides for the use of common DS3 to DS1 multiplexers on the end office side of an access tandem for traffic that is switched at an access tandem and/or FGA traffic.

When the customer orders a DS3 Entrance Facility with DS3 Direct Trunked Transport to an end office or access tandem, the customer must order the DS3 to DS1 Multiplexing Optional Feature at the end office or access tandem.
