ACCESS SERVICE

4. SWITCHED ACCESS SERVICE (Cont'd)

4.1 General (Cont'd)

4.1.2 Rate Categories (Cont'd)

(B) Local Switching (Cont'd)

(2) Transport Termination

Transport Termination provides for the line or trunk side arrangements which terminate the Local Transport facilities. Included as part of Transport Termination are various nonchargeable optional termination arrangements. These optional terminating arrangements are described in 4.3.2 following.

The number of Transport Terminations provided will be determined by the Telephone Company as set forth in 4.5.6 following.

4.1.3 Acceptance Testing

At no additional charge, the Telephone Company will, at the customer's request, cooperatively test, at the time of installation, the following parameters: loss, C-notched noise, C-message noise, 3-tone slope, d.c. continuity and operational signaling. When the Local Transport is provided with Interface Groups 2 through 6, and the Transport Termination is two-wire (i.e., there is a four-wire to two-wire conversion in Local Transport), balance parameters (equal level echo path loss) may also be tested.

4.1.4 Ordering Options and Conditions

Switched Access Service is ordered under the Access Order provisions set forth in 5, preceding. Also, included in that section are other charges which may be associated with ordering Switched Access Service (e.g., Service Date Change Charges, Cancellation Charges, etc).

Issued By: Paul Butler, Vice President, 254 36th Street, Unit 12 – Suite C304, Brooklyn, NY 11232

Cancelled by supplement No. 1 effective 06/13/2022
