SECTION 3 - GENERAL DESCRIPTION OF SERVICE

3.4 Calculation of Distance

For mileage sensitive services, the distance between originating and terminating points of a call or private line facility are determined using vertical ("V") and horizontal ("H") coordinates for the serving wire center(s) or Company access point(s) associated with the call or facility. For purposes of determining the airline mileage of a call the Company references the V and H coordinates as found in Telcordia's V&H Tape and NECA FCC Tariff No. 4. The use of coordinates for wire centers versus access points and the method for calculating actual distances varies based on the type of service and the form of access used to reach the Company network.
