ACCESS SERVICE

---

**SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D.)**

**3.3 Rate Categories (Cont'd.)**

**3.3.6 Local Switching**

Local Switching provides the local end office switching and end user termination functions necessary to complete the transmission of switched access communications to and from the end users served by the local end office. Local Switching includes Local End Office Switching.

The Dedicated End Office Trunk Port provides for the termination of a dedicated voice frequency transmission path into the End Office. The Dedicated End Office Trunk Port rate is set forth in Section 3.9.

**3.3.7 Local Transport**

Local Transport provides the transmission facilities between the Customer's premises and the end office switch(es) where the Customer's traffic is switched to originate or terminate its communications. Local Transport is a two-way voice frequency transmission path composed of facilities specified by the Customer, or, for tandem switched transport, determined by the Company. Local Transport includes an Entrance Facility, Channel Mileage, Local Transport Termination, Local Transport Facility, and Local Transport Tandem Switching.
