SUPERSEDING REVISION: 7

**SERVICE CLASSIFICATION No. 19 – continued**

**1. Tier 1 - Capacity Release**

Subject to the conditions described below, the Company will release interstate pipeline capacity to the Seller or Seller's Agent each month of the Gas Year. The amount of interstate capacity released (the "Tier 1 Capacity Release Volume") will be set at 75% of the estimated November daily load grossed up for LAUF of the Seller's pool at the start of the Gas Year. The Company will release interstate pipeline capacity on the "Selected Pipelines," as specified in the Company's GTOP Manual. As the Gas Year progresses, the Company will recalculate the equivalent November daily load grossed up for LAUF of the Seller's pool each month to reflect any increase or decrease in the number or demand of customers in the pool, and adjust the Tier 1 Capacity Release Volume accordingly. If the Tier 1 Capacity Release Volume is insufficient to fully meet the requirements of the Seller's pool during the summer months of May through October, the Company will increase the Tier 1 Capacity Release Volume each summer month, as required, to match the estimated load of the pool grossed up for LAUF. The Tier 1 capacity released on the Selected Pipelines will be at the Selected Pipelines' maximum rates. Effective November 1, 2010, the Tier 1 capacity released on the Selected Pipelines will be at the Company's WACOC. The Seller or Seller's Agent is responsible for all fixed and variable costs associated with the released capacity. The Seller or Seller's Agent must deliver supply to the Company on the Selected Pipelines as specified in the Company's GTOP manual.
